# FINANCING BUILT AROUND YOU

We make it easy to get into the machine of your dreams. Whether you're upgrading your fleet or adding extra muscle for a big job, we have flexible financing options designed to fit your business and your budget.

## CASH DISCOUNTS

Paying cash? We'll give you a discount off the final price.

## RENTAL PURCHASE OPTIONS (RPO)

Try it before you buy it. Rent the equipment for a set time and apply a portion of those rental payments toward the purchase price.

## LEASE PROGRAMS

Lease a machine for a set period of time and walk away when it's done. No strings, no surprises.

## BALLOON PAYMENTS

Starting a new business or waiting for the busy season to hit? Balloon payments start small and grow over time, making it easier to get started.

## SEASONAL SKIP PAYMENTS

If your business runs hot in the summer and cool in the winter, this plan lets you make payments only during your working months.

## LOW RATE FINANCING

We partner with top manufacturers to offer special low-interest programs that keep more money in your pocket.

## SEMI OR ANNUAL PAYMENTS

Prefer fewer payments? Choose a plan with semi-annual or annual payment schedules that work around your business cycle.

## BAD CREDIT, NO CREDIT? DON'T SWEAT IT

We'll work with you to find a solution that works for you. Some programs may require a down payment to qualify. Or, you can bring your own financing, and we'll gladly work with that too.

## QUICK CREDIT APPLICATIONS

Once you've talked through your options with your sales rep and picked a plan that works for you, we'll get your credit application started. Most approvals happen in under an hour.

# CONTROL YOUR FUTURE WITH MACHINE CONTROL

## WHAT IS MACHINE CONTROL?

Machine control uses GPS, lasers, and onboard sensors to automate excavation, grading, and paving with real-time feedback for consistent, repeatable precision. With a small investment, it delivers jobsite advantages that pay back again and again.

## WHY CUSTOMERS CHOOSE MACHINE CONTROL

**A small investment in Machine Control helps you:**

**SAVE MONEY:** Budget smarter with faster performance, plus share hardware across machines.

**ELIMINATE MATERIAL WASTE:** Prevents rework, over-digging, undercutting, and lost time

**INCREASE YOUR PRODUCTIVITY:** Laser and GPS guidance boosts performance and cuts waste.

**REDUCE FUEL CONSUMPTION:** Lower your fuel costs by making fewer passes.

**SPEED UP PROJECT TIMELINES:** Faster grading and excavation lead to quicker job completion.

**MINIMIZE LABOR COSTS:** Fewer people are needed for staking, checking grades, or fixing mistakes.

**UPGRADE TECHNOLOGY:** Start small, then upgrade features and hardware as needed.

### FAQ

#### WILL THIS WORK WITH MY CURRENT EQUIPMENT?

Many models are factory-ready, and retrofit kits make it possible for most machines, including older units.

#### I ALREADY USE ANOTHER BRAND—CAN YOU HELP ME?

Of course. We can work with most other systems with minor hardware and software integrations.

# MORE POWER TO YOU

Southeastern has partnered with Case Construction to offer electric equipment that delivers the torque, performance, and reliability you expect without the noise, emissions, or fuel costs.

Built for real jobs and real operators, these machines open the door to new opportunities, from city projects and indoor work to contracts that require low-emission equipment.

## WHY CONTRACTORS CHOOSE ELECTRIC:

- 
**CUT OPERATING COSTS**  
 No fuel. No oil changes. Less downtime. More money in your pocket.
- 
**REDUCE NOISE AND EMISSIONS**  
 Work any time, anywhere — even near schools, hospitals, and neighborhoods.
- 
**BUILT TO WORK, NOT TO IDLE**  
 Electric power only runs when you do, so there's zero wasted energy and wasted time.
- 
**PLUG IN, POWER UP ANYWHERE**  
 Standard AC charging or optional fast-charge options keep you running full days.
- 
**COMFORT THAT PAYS OFF**  
 Smooth, quiet performance reduces fatigue and keeps operators fresh and focused.
- 
**KEEP YOUR FLEET FLEXIBLE**  
 Same buckets, thumbs, augers, and attachments you already use, so there's no retooling required.
- 
**EASY TO MOVE, EASIER TO MANAGE**  
 Compact sizes and trailer-ready weights make EV models perfect for tight sites and mobile crews.

### THE FUTURE OF POWER — READY FOR WORK

Electric machines aren't just for tomorrow's jobs — they're ready to work today. Call, click, or stop by your local Southeastern branch to learn more about electric models and financing options.
